Dear Potential Exhibitor:

On behalf of **The University of Texas MD Anderson Cancer Center** and **Activity Director, Patricia Brock, MD**, Deputy Chair and Executive Medical Director of Inpatient Operations, Department of Emergency Medicine and **Co-Director, Monica Wattana, MD**, Associate Professor, Department of Emergency Medicine we would like to invite you to exhibit at our upcoming **2026 Oncologic Emergency Medicine Conference**, scheduled for **February 6 – 7, 2026** at **The MD Anderson Cancer Center Duncan Building in Houston, Texas**. We offer a variety of exhibitor packages, as well as some Non-CE Satellite Symposium opportunities for your consideration, each designed to provide unique opportunities for participation.

OVERVIEW

This conference aims to continue to fill the knowledge gap in Oncologic Emergency Medicine by providing information in an interactive forum that in turn enhances medical decision-making by healthcare providers working in an acute care setting.

NEEDS ASSESSMENT

Oncologic Emergency Medicine has evolved as a subspecialty. Acute care providers working in rural, community and/or academic based environments continue to be challenged with treating oncology patients and are not aware of potential best practices that allows them to provide the highest quality/most effective care.

Our conference educates attendees in the best treatments and supportive care practices across multiple cancer indications. Attending this conference will increase participants' knowledge of how to best treat the oncologic patients they encounter as well as increase their awareness specific to the current state as well as the future of oncologic emergency medicine.

KNOWLEDGE GAP

The knowledge gap in healthcare workers continues to exist because advancements in cancer therapeutics and increased survivorship continues to grow and evolve.

Currently, training for providers working in emergency departments on oncologic emergencies is limited. In addition, there is no standardized training curriculum for trainees interested in oncologic emergency medicine.

COMPETENCE GAP

The attendees will be from both academic and non-academic organizations. The skills gained from this conference will enhance their clinical practice to screen, stabilize and treat patients with cancer that arrives in the Emergency Department.

OBJECTIVES

At the conclusion of this educational activity, participants should be able to:

- Recall extensive knowledge of the past, current and future state of the specialty of Oncologic Emergency Medicine
- Apply clinical best practices for treating oncologic emergencies in an acute care setting.
- Demonstrate effective communication and teamwork in conjunction with attending to the complex care of patients with cancer
- Recognize the role of Emergency Medicine practitioners in treating patients diagnosed with cancer.
- Review the importance of education in Oncologic Emergency Medicine

We are anticipating 150 Physicians, Nurse Practitioners, Physician Associates, Nurses, Pharmacists, Pharmacy Technicians, Students and Trainees.
