Inaugural Brain Tumor Center Trainee Symposium

Friday, September 13, 2024

8 a.m.-3 p.m.

[Zoom Link](#)

This one-of-a-kind trainee-led and moderated virtual symposium will feature multidisciplinary presentations by national and international trainees who were first authors of outstanding recent high-impact publications spanning clinical and translational research in multiple disciplines, including neurobiology, tumor-immune interactions, cancer neuroscience, and their application to neuro-oncological disorders. The symposium will also feature keynote addresses by internationally renowned speakers.

Final agenda and registration details to be announced.
