Target Audience:

> Professions: Nurse - RN

Description:
Immunotherapy is the latest pillar in the systemic treatment of cancer. Oncology nurses play a key role in assessing and managing patients on these agents. This program will provide an overview of cancer biology, principles of immunotherapy and discussion of the different classifications of these agents. This will include information on checkpoint inhibitors, bispecific antibodies, antibody drug conjugates, and immune effector cells.

Learning Objectives:
1 Describe carcinogenesis and genomic changes resulting in the hallmark characteristics of cancer cells.
2 Summarize the classification of immunotargeted agents with implications for side effect management and patient teaching.
