# Your genetic test is headed to Invitae.

## Invitae is dedicated to making genetics accessible and affordable.

While insurance providers are beginning to cover genetic testing, you may still have an out-of-pocket expense. If you've met your deductible, you'll likely owe little-to-none. If you haven't met your deductible, you may have an out-of-pocket expense that will apply toward your annual deductible. The average out-of-pocket amount that Invitae patients with insurance end up paying is \$100.

If you're concerned about cost, please reach out to Invitae's billing team at the phone or email address below. We have flexible payment plan options, and a Patient Assistance Program, which may bring down the amount you owe if you qualify.

# How does billing work?

- 1. Invitae's billing team will perform a benefits investigation to determine what you might expect to pay out-of-pocket toward your annual deductible.
- 2. Once the benefits investigation is complete, the billing team will reach out by text and/or email with your estimated out-of-pocket amount.
- 3. Once your test is complete, Invitae will submit a claim to your insurance and send you a statement if you owe anything towards your deductible.

If your provider has ordered multiple tests, you will receive separate notifications for each test.
