Serving Patients Through Innovative Care

We are a global, privately held pharmaceutical company founded in France with a 65-year heritage. Governed by a non-profit foundation, we put patients before profits and re-invest 25% of our revenue (excluding generic drugs) into research and development.

At Servier, everything we do is about meeting patients' needs—whatever they may be—before, during, and post-treatment. We're passionate about survivorship and care.
